

# Multi-Function Tuner

With soundhole bracket and piezo tuning.

The Planet Waves Multi-Function Tuner is a compact, ultra-light chromatic tuner that offers traditional 1/4" input tuning in addition to in-line and microphone tuning. The unique, patent-pending rotary user-interface enables the tuner to operate in sweep or strobe modes in dark or light environments. The tuner includes standard 1/4" input and output jacks and a sensitive condenser microphone. The Pocket tuner is the ultimate solution for compact, lightweight tuning of virtually any electric or acoustic instrument.

## > Strobe Mode

The note played displays in green while red LEDs chase around counter-clockwise if you are flat and clockwise if you are sharp. They slow down as you tune and stop when you are in tune.

## > Sweep Mode

The note played displays in green while red LEDs sweep left or right to indicate whether you are flat or sharp.

## > Clips On

Headstock, bridge, or amplifier handle.

## > Hangs On

Acoustic guitar sound holes.

- > One-button operation: Toggle through modes easily with the button in the center of the dial – sweep mode, strobe mode, power off.
